

Addition: Jan 2016 to PSU OPP Design & Construction standards

.07 Lactating rooms

- A. All new buildings shall have a lactating room at the following locations.
 - 1. Beside the first floor single user toilet room required in section .05 above
- B. In existing buildings where a level “3” alteration is planned (prefer in the vicinity of the single user toilet room).
- C. All lactating rooms shall meet the requirements of the current adopted International Building Code and the Americans with Disabilities Act Standards.
- D. The lactating room shall contain at a minimum:
 - 1. Comfortable living room style chair
 - 2. Lockable storage cabinet for breast pump (min. 3-feet long by 2-feet deep)
 - 3. Sink w/ counter space, soap & paper towel dispenser
 - 4. Adequate refrigerator space (portable refrigerator located on or under the sink counter space)
 - 5. Electric outlet (110v, 20 amp, polarized) for breast pump (located in proximity to chair)
 - 6. Lockable entrance door with vacancy or occupancy I.D. tag (similar to Schlage L series mortise indicators L283-712, L283-722)
 - 7. Appropriate room signage as defined by the PSU signage standards.
